

Your help to DRC-Rape Centre In Kamituga-City

I am a member of IAGS and am working on a project to develop a Centre for rape and torture victims in the DR Congo.

While most victims of rape in the war are female, men and children have also been raped, and torture is widespread. But it's not just enough to write about this; we want to make a difference.

Please, could I ask you to look over the attachments and see if you can assist us.

We really need your help.

My organization is Kataliko actions for Africa-KAF, NGO with special consultative status in ECOSOC/UN.

We work in province of Sud-Kivu. There we contribute to the rehabilitation of victims of rape, torture and crimes against humanity (Bukavu, Kabare and Mwenga). We have our main office in Bukavu and the Clinic of rehabilitation in Kamituga-city.

We need to reinforce and enlarge this clinic to prevent and address sexual and gender-based violence by providing medical and psychosocial care to rural survivors and their partners, providing training on voluntary HIV testing and counseling, reporting sexual abuses and advocating with local authorities for the protection of human rights, with special care for vulnerable groups including women.

But we don't have enough money for this project. Can you help us with your financial support? if yes, I can send to you our project.

At the moment, we got financial support of State of Fribourg and of NGO Gruppo terzo mondo of Italy and the civil society of Kamituga. We have now 30000\$ and a car of transportation of materials.

We need 275 000\$ to finish this project in 2016 and would truly welcome your ideas and support.

Sincerely yours,

Dr. iur. Ambroise Bulambo (PhD)

President and Founder
